Message:

EG304 is a 30% chemically coupled glass fibre reinforced polypropylene compound intended for injection moulding.
The product is available in natural, but other colours can be provided on request.
EG304 has been developed especially for demanding applications in automotive industry and various engineering sectors.
EG304 has high rigidity, good dimensional stability and good creep resistancy also at high temperatures. It has high flow rate and very good process ability.
APPLICATIONS
Product requiring high service temperature and extremely high mechanical strength such as:
Sockets and junction boxes for electrical industry
Electrical tool and appliance components
Miscellaneous technically items
Air filters
Car grilles
Lamp housing
Can suitably be made from EG304.
