Fibremod[™] GB601HP

Polypropylene

Borealis AG

Message:

Fibremod GB601HP is a special long glass fibre reinforced polypropylene concentrate grade intended for injection moulding and extrusion. This material is designed for the dilution process in combination with special developed dilution polypropylene grades, for example homopolymer HK060AE or copolymer BJ356MO. This combination of concentrate - dilution polypropylene should then be adjusted for a glass fibre content range of 20 - 40 % in the end product. The product is available in standard black 9502. This grade is additionally available in an emission optimized version with the same technical properties.

General Information				
Filler / Reinforcement	Glass fiber reinforced material, 30% filler by weight			
Features	Good dimensional stability			
	Moisture resistance			
	Rigidity, high			
	High strength			
	Impact resistance, high			
	Recyclable materials			
	Good creep resistance			
	Heat resistance, high			
Appearance	Black			
Processing Method	Injection molding
