

CYCOM® 759

Epoxy; Epoxide

Cytec Industries Inc.

Message:

CYCOM® 759 is a modified epoxy laminating material designed for use in load bearing structural composites, combining good moisture resistance with damage tolerance and thermal properties. CYCOM 759 has been formulated to have extremely forgiving processing characteristics to enable it to meet the diverse molding conditions used within the composites industry.

CYCOM 759 is available on both woven and unidirectional glass, carbon and aramid fiber reinforcing materials and has an out-life under ambient conditions in excess of four weeks, maintaining excellent tack and drape characteristics.

CYCOM 759 laminating resin is fully compatible with unidirectional or woven carbon, glass or aramid reinforcing fibers and is available in various weave styles and fiber weights

General Information		
Features	Good Processability	
	Low Moisture Absorption	
Uses	Aerospace Applications	
	Structural Parts	
Forms	Fabric	
	Fiber	
Processing Method	Laminating	
Additional Information	Nominal Value	Unit
Volatiles	< 2.0	%
