TechnoMid A330

Polyamide 66

TechnoCompound GmbH

Message:

TechnoMid compounds are particularly suitable for technical applications due to their outstanding characteristics. The excellent sliding qualities and the favourable abrasion behaviour of TechnoMid compounds also permit their use in bearings.

TechnoMid compounds count among the technical thermoplastic compounds.

PA6 is made from caprolactam by means of hydrolytic polymerisation. The PA6.6 is produced by poly-condensation of hexa-ethylene diamine and adipic
