# Viton® A-200

## Fluoroelastomer

## **DuPont Performance Elastomers**

#### Message:

Viton ® A-200 fluoroelastomer is an "A-family" gum polymer that demonstrates improved processing when compared with existing fluoroelastomers. Viton A-200 is designed for use with the clean molding bisphenol curative, Viton Curative No. 50. Compared to other "A-family" dipolymers, Viton A-200 provides:

- -Lower viscosity
- -Improved mold flow
- -Excellent extrusion characteristics
- -Better mold release
- -Less mold fouling
- -Improved compression set resistance
- Applications:
- -Transfer and injection molding
- --O-rings
- --Valve stem seals and shaft seals
- --Parts with complicated shapes
- -Extrusions
- --Fuel hose and tubing
- -Solution coating
- --Fabric
- --Tanks or chemical containers

| General Information |                               |
|---------------------|-------------------------------|
| Features            | Low compressive deformability |
|                     | Low viscosity                 |
|                     | Good liquidity                |
|                     | Compliance of Food Exposure   |
|                     | Good demoulding performance   |
|                     |                               |
| Uses                | Washer                        |
|                     | Pipe                          |
|                     | Pipe fittings                 |
|                     | Seals                         |
|                     | Coating application           |
|                     | Fabric coating                |
|                     |                               |
| Agency Ratings      | FDA 21 CFR 177.2600 2         |
| Appearance          | Grey                          |
| Forms               | Particle                      |
| Processing Method   | Extrusion                     |
|                     | Resin transfer molding        |
|                     | Coating                       |
|                     | Calendering                   |
|                     | Injection molding             |
|                     |                               |
