# Vital-Line SHE6545G

## Flexible Polyvinyl Chloride

Teknor Apex Asia Pacific PTE. LTD.

#### Message:

Vital-Line SHE6545G is a flexible polyvinyl chloride material. This product is available in the Asia-Pacific region and is processed by extrusion.

The main features of Vital-Line SHE6545G are:

sterilizable

plasticization

The typical application fields of Vital-Line SHE6545G are: medical/health care

|---------------------------------------|---------------------------|-------|---------------|
| Features                              | Non-phthalate plasticizer |       |               |
|                                       | Radiation disinfection    |       |               |
|                                       |                           |       |               |
| Uses                                  | Medical/nursing supplies  |       |               |
| Forms                                 | Particle                  |       |               |
| Processing Method                     | Extrusion                 |       |               |
| Physical                              | Nominal Value             | Unit  | Test Method   |
| Specific Gravity                      | 1.18 - 1.22               | g/cm³ | ASTM D792     |
| Hardness                              | Nominal Value             | Unit  | Test Method   |
| Durometer Hardness (Shore A)          | 70 - 76                   |       | ASTM D2240    |
| Mechanical                            | Nominal Value             | Unit  | Test Method   |
| Tensile Strength <sup>1</sup> (Yield) | > 14.7                    | МРа   | ASTM D638     |
| Tensile Elongation (Break)            | > 300                     | %     | ASTM D638     |
| Thermal                               | Nominal Value             | Unit  | Test Method   |
| Thermal stability-Oven (190°C)        | > 30.0                    | min   | ASTM D2115-92 |

Typical temperature profile for processing compound is from 135°C to 175°C. The optimum temperatures depend on the type of machine as well as screw design being used to process. Feeding zone:  $135^{\circ}$ CCompression zone:  $145^{\circ}$ C $\sim$ 155°CMixing zone:  $155^{\circ}$ C $\sim$ 170°CNozzle/Die Zone:  $160^{\circ}$ C $\sim$ 175°C

NOTE

1. 500 mm/min
