Message:

DW360 - 8229 is a 30% glass - filled polypropylene compound intended for injection moulding.

The product is available in both black (DW360 - 8229) and natural (DW300) but other colours can be provided on request.

DW360 - 8229 has been developed especially for the automotive applications and electrical components.

The good flowability of DW360 - 8229 makes it very easy to process even for complicated parts with long flow paths and it offers very high productivity with short cycle times. DW360 - 9229 is formulated to give an excellent surface finish with good scuff resistance.

APPLICATIONS

Products requiring good rigidity, low shrinkage, high dimensional stability can suitably be made from DW360 - 8229.
